AGiLe Panels

Introduction

CommScope completes its G2 fiber panel portfolio with the new CommScope AGL panel line.

AGL fiber panels are agile, simple, and cost effective. Adding versatility to any network.

The 1RU panels accept four of the popular G2 style modules and adapter packs for capacity of up to 96f LC or 32f MPO.

Multiple versions are available including open, closed, fixed, sliding and angled.

The AGL panels offer network flexibility at a budget-friendly cost

Branding : CommScope

This product is suitable for both NETCONNECT & SYSTIMAX Solutions

Why AGiLe panels

Target Vertical Markets

AGiLe panels will be typically used in the low fiber density applications in an Enterprise Data Center and Campus applications.

Typical Applications

AGiLe panels are used in Indoor applications.

For either splicing or patching, the G2 footprint in the panels allows the use of G2 modules, adapter packs or pigtails cassettes. Splicing trays with SMOUV/RIBBON or ANT are also available.

Extra accessories are also available such as a bezel with M-series copper connectors.
